

LC FLEXI-BOOT OS1 Singlemode & OM4 Multimode Fibre Optic Duplex Patch Leads

4Cabling's range of Flexi-Boot Fibre optic patch leads offer a unique approach to cable management. These specialised boots are designed to bend from closer to the connector and maintain any angle or direction from straight to 90° by way of a specialised wire. This ingenious boot is used to keep fibre patch leads clean and organised and set back from rack doors and other external factors that can tap on a fibre lead until its ultimate destruction.

4Cabling's optic patch leads are immune to EMI/RFI and are used to connect high speed and legacy networks. The multimode patch leads are manufactured using LSZH cables which conform to IEC, EIA TIA and Telecordia standards.

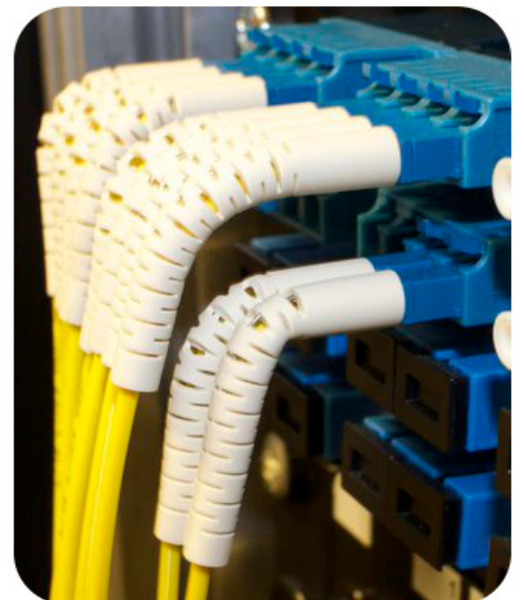

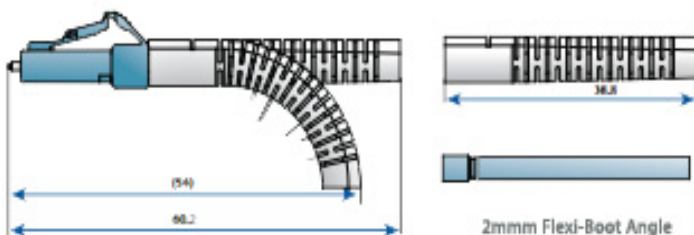

FEATURES

- OS1 & OM4 fibre patch leads conform to ITU-651, TIA/EIA492AAAD
- Ultra Flexible with internal wire to set & forget the bend radius of installed patch leads
- 2mm Oversleeving
- Individually labelled for lead tracing
- Low smoke zero halogen (LSZH) cable
- Manufactured with stringent quality control
- All leads are supplied with a factory test report
- OS1 Singlemode - yellow jacket zip cord multi-mode 9 / 125µm
- OM4 Multimode - aqua jacket zip cord multi-mode 50 / 125µm
- Simplex and Duplex configurable assemblies for LC Patch leads
- All ends are polished and individually inspected for correct polishing
- Supports high speed multi-channel data, voice & video applications

LC Flexi-Boot OS1 Singlemode

AVAILABLE LENGTHS: 0.5m, 1m, 1.5m, 2m, 3m & 5m
